Technical Evaluation

Task

Task Description: Creating a Descriptive Dashboard

Objective: The objective of this task is to create a descriptive using the attached dataset. The dashboard should provide a comprehensive overview of the data, including descriptive insights, trends

Dataset: You have been provided with a dataset (please find the Excel Sheet attached) containing relevant information for analysis. The dataset includes multiple variables such as Claim Information, Amount to be paid, Actual Paid Amount, Reason for rejection, and other relevant attributes.

Deliverables

1. Dashboard Design:

   - Design a visually appealing and intuitive dashboard to present the analyzed data.
   - Use appropriate visualization techniques to display descriptive statistics and insights.
   - Include interactive elements to allow users to filter and explore the data based on different criteria.
   - The data should be presented with different aspects.
